

Building... And Sharing Your Network of Trusted Service Providers Is Key to Creating Rapid... And Lifetime Referral Income!

Every business owner realizes that networking via “Word of Mouth” advertising generates more income than all other forms of advertising combined!

Fact... growing your Network’s Trusted Service Provider Directory in REEferralNet.com... *daily...* feeds directly into your Network’s pipeline of long-term, substantial referral income! Imagine growing your Network by 1-2, or even 3, new Trusted Service Providers you didn’t know about when you woke up... every day! In just one year, that’s 365 referral sources! When you follow this business-building formula and add just two a day... that’s 730 new referral sources by this time next year! Doing the math... 3 new referral sources a day that you didn’t know when you woke up each day is 1,095 new referral sources, again, by this time next year! One constant... networking and “Word of Mouth” advertising works if you do!

REEferralNET is a referral relationship-building application initially designed for real estate professionals to share Trusted Service Providers with clients while generating high-quality leads and referral income for their business. Although initially developed for real estate, REEferralNET and REEferralNet.com are SO MUCH MORE! Referral and “Word of Mouth” Marketing is in no way limited to or exclusive to any specific industry. Therefore, we HIGHLY recommend that you develop your own list of categories.

It’s a simple process! Review these listed Service Categories on both the Home Improvement Services and General Categories and identify any category that is not presently in your Network’s Trusted Service Provider Directory! Seek out these Trusted Service Providers using your personal experiences and/or referrals from those in your Sphere of Influence (SOI)! Ask your potential new Trusted Service Provider if you would be allowed to refer business to them. If so, almost all the information you need to add them to your Trusted Service Provider list is on their business card: name, address, telephone number, email address, and their business website! Then vet them for credibility as you deem appropriate. Once vetted and approved, add them to your Trusted Service Provider Directory. Then send this new Trusted Service Provider the URL to your personal REEferralNet.com web page so they can view their referral listing in your Trusted Service Provider Directory for accuracy and completeness. You can always make any changes, corrections, or deletions as needed while building and maintaining your Trusted Service Provider Directory.

If you have the opportunity to know and possibly work with any relocating home buyers moving into your community, you can deliver a valuable service by helping them connect with your Network’s Trusted Service Provider Directory to secure replacements for the trusted service providers they left behind!

Review the list of potential Trusted Service Providers suggested below... and begin building your Network’s Trusted Service Provider Directory and start earning referral income NOW!

Home Improvement Services Category Suggestions (Alphabetical)
